About MediConnect Global™

MediConnect Global Inc., an independent company established in 1996, is the worldwide leader in medical record retrieval, digitization, coding and delivery via the Internet. Accelerated by the acquisition of PassportMD™ (now myMediConnect™), in Q1 2010, the company is at the forefront of a transformative movement, ushering in the digital age of personal health records by giving individuals the knowledge and power to take control of their own healthcare—and health.

Using its proprietary software and established worldwide healthcare provider relationships, MediConnect Global accurately and rapidly retrieves any quantity of medical records—for customers ranging from single consumers to companies that need millions of records—then delivers those records in an organized and searchable digital format. All MediConnect Global customers benefit from access to the single largest repository of medical records gathered from throughout the world maintained with the highest level of HIPAA standards-based security.

Through its patented record retrieval and delivery processes, MediConnect Global helps organizations turn inefficient processes into centralized, Web-based workflows that increase project transparency and dramatically reduce time and cost. The company is equally committed to empowering individuals to take control of their own healthcare, which begins with ownership of the medical information found on their medical records. As digital medical records come to play an accelerating role in healthcare, both for providers and consumers, MediConnect Global is poised to lead in the flow of medical information that fuels these developments.

The MediConnect Global Advantage

MediConnect Global's reputation for excellence has earned it a diverse global clientele that includes four of the top five health insurers, together with many other leading health and life insurers in the United States and other nations. The company has also represented a host of plaintiff and defense law firms, and been appointed as the sole vendor for some of the most important litigation cases of all time.

MediConnect Global also maintains key strategic and technological relationships with more than one million hospitals and provider offices in the U.S., Canada and Puerto Rico. These relationships expand its reach, increase its accuracy and expedite its delivery of medical records.

As MediConnect Global extends its leadership in advancing global transformation through digital healthcare information, its contribution to the security and accessibility of medical information will continue to improve the quality of patient care, advance clinical trials, foster medical research and facilitate medical tourism and personalized medicine worldwide.

MediConnect Global Products and Services

MediConnect Global's best-in-class products and services have been designed to integrate seamlessly with clients' systems, and to enable users to store, maintain and manage medical records within MediConnect Global's secure online portal. Powered by a superior technology platform, MediConnect Global's retrieval and document management systems maximize efficiencies and effectiveness, while enabling users to easily and effectively customize solutions. The company has also developed the industry's most comprehensive healthcare provider database, with access to thousands of providers throughout the world.

The company's primary products and services include: RapidRetrieve™, RapidReview™ and MyMediConnect™.

RapidRetrieve™

MediConnect Global's flagship online medical record retrieval service, RapidRetrieve, enables the company to quickly and accurately deliver any quantity of medical records, while allowing customers to easily track and manage record requests online. MediConnect Global's processes are fully HIPAA compliant. MediConnect Global maintains a worldwide client roster and routinely retrieves records from every continent except Antarctica.

RapidRetrieve offers unlimited online access to all of MediConnect Global's tools, resources and capabilities. Using RapidRetrieve, customers can place requests for medical records; track the progress of their request through detailed, view real-time notes; communicate directly with their record retrieval agents; and instantly download digitized copies of their requested records.

RapidRetrieve seamlessly integrates with many of the emerging and elite top-branded businesses in their respective fields, providing MediConnect Global customers with complementary tools and added convenience.

RapidReview™

RapidReview is a highly customizable and scalable digital online workflow system providing health payers with complete process transparency, easy access to data, efficient data tracking, fast record processing, detailed enterprise reporting, high levels of quality control and management of people and resources.

RapidReview is the most comprehensive, centralized solution on the market today offering advanced features such as document annotation and the ability to dynamically aggregate critical records information from multiple sources into a single digital form.

RapidReview was designed to accommodate and enhance any health payer's workflow via robust and flexible management controls allowing a payer to quickly create the most effective and efficient workflow tailored to specific needs. RapidReview's workflow management tools ensure a payer's policies and procedures are properly enforced through assignments/reassignments, quality checks, and user accountability.

RapidReview can be easily scaled to meet any departmental need including:

- Medicare Risk Adjustment
- Medicaid Risk Adjustment
- Coding Audits
- DRG Audits
- HEDIS Extraction
- Fraud and Abuse

myMediConnect™

MediConnect Global's new myMediConnect offering is a highly secure online consumer health portal that provides users with a centralized and easy-to-use repository for all of their personal and family health information.

Using MediConnect Global's exclusive record retrieval system, myMediConnect empowers individuals to take control of their own healthcare, by retrieving patient records, effectively organizing and digitizing the information and securely providing it to users online in a HIPAA-compliant environment.

myMediConnect's integrated features allow users to become better educated about healthcare issues, track progress towards personal fitness goals, connect more easily with physicians, save money on medications and research HSA providers. myMediConnect was designed to provide any user a safe way to effectively track and maintain his or her health.

myMediConnect is committed to establishing the personal health record as the future of digitized medical records and is one of four PHR services chosen by the U.S. federal government to participate in the current Medicare pilot program.
